

Question bank

Chapter-1 Flash

Q-1 Fill in the blanks

- (b) To create text, you simply select the _____ tool, click, and start typing.
- (c) Two tools are available for just drawing lines: the _____ tool and the _____ tool.
- (d) Shortcut to save files in Macromedia Flash Version 8 is _____.
- (a) The two tools to create fills are the _____ tool and the _____ tool.

Chapter-2 Animation in Flash

Q-1 Fill in the blanks

- (a) Each layer is a concurrent where an animation can play.
- (b) Layers provide a visual tool to control order for Drawing objects, groups, or symbols.
- (c) If you want more things to animate simultaneously, you should put each one in its own
- (d) are reusable elements that you can be used with a document.

Q-2 True Or False

- (a) Frame -by- Frame animation changes the contents of every frame.
- (b) Keyframe allows you to play an animation.
- (c) Press Ctrl+Enter to test the movie.
- (d) Static text updates automatically at runtime.

Multiple Choice Questions

- (a) In Flash, multiple layers are actually Timelines.
 - (i) Single
 - (ii) Multiple

(iii) Both a and b

(b) Shortcut to create layer for each symbol is

(i) Created on layer

(ii) 'Distribute to layers' option on right button on Timeline click after selecting all objects

(iii) Both a and b

(c) are used to stack graphics on top or below other graphics.

(i) Movie clip symbols

(ii) Layers

(iii) Buttons symbols

(d) You are working on Layer1 currently. When you add new layer, it shall be added Layer1.

(i) Above

(ii) Above for left click, below for right click

(iii) Below

Chapter-3 VB. NET

Q-1 True Or False

(a) Properties are named members of classes, structures, and interfaces.

(b) The execution of the get accessor is equivalent to reading the value of the field.

(c) The set accessor is similar to a method that returns void.

(d) When you assign a value to the property, the set accessor is invoked with an argument that provides the old value.

Q-2 Fill in the blanks

(a) .NET framework offers a _____ of languages which puts us programmers into a deep thought process about which programming language best suits our needs.

(b) A _____ is a named memory location.

- (c) Constants are very similar to _____ .
- (d) VB.NET supports block-level _____ of variables.

Chapter-4 JAVA Programming

Q-1 Fill in the blanks

- (a) The _____ language was designed at Sun Microsystems over a five year period, culminating in its first release in January 1996.
- (b) Java became a language that would execute on a number of systems and now has implementations for virtually all common computers and _____ .
- (c) Since Java could now run on nearly any kind of workstation, it became an ideal vehicle for adding powerful computational capabilities to _____ .
- (d) Java applets are also restricted from writing into _____ outside of the Java address space.

Q-2 True Or False

- (a) Java is object oriented.
- (b) Java works on most platforms.
- (c) You can write Java programs with any text editor program provided with Windows.
- (c) All Java source files have the .java extension.

Chapter-5 HTML

Q-1 Fill in the blanks

- (a) HTML documents may contain style sheet rules directly in them or they may style sheets.
- (b) HTML allows authors to design that take advantage of the characteristics of the media .
- (c) uses color values to specify a color.
- (d) attachment determines whether a background image is fixed or scrolls with the rest of the page.

Q-2 True Or False

- (a) Tag has one left angular bracket<, which is commonly recognized in the form of less than sign. Tag name is written after this sign and close it by right angular bracket '>'.
- (b) HTML tags tell your browser which elements to present and how to present them.
- (c) HEAD and BODY elements are kept inside the HTML element.
- (d) HTML does not understand the difference between capital and small letters.

Multiple Choice Questions

(a) The option that shows you the HTML coding.

- (i) forward
- (ii) refresh
- (iii) source

(b) Original HTML is designed by:

- (i) Tim Berners Lee at CERN
- (ii) Dan Connolly
- (iii) Karen Olson Mulderow

(c) The elements that include both ON and OFF tags are called.

- (i) container element
- (ii) container element
- (iii) empty elements
- (iv) tag

(d) This attribute is used to set the color of the background.

- (i) BG color
- (ii) Colour
- (iii) Background colour

Chapter-6 Basic of DBMS and RDBMS

Q-1 Fill in the blanks

- (d) Its a column, having referential integrity constraint called
- (a) Small set of information becomes , this set of information helps make decision.
- (b) It's a with a NOT NULL constraint and Check constraint to be > 0.
- (c) represents some aspect of the real world called ".....".

Multiple Choice Questions

(a) DBMS accepts the 'flat file' data that means there is no relation among data whereas RDBMS does not accept this type of design.

- (i) same
- (ii) wrong
- (iii) different

(b) RDBMS solution is required by large sets of whereas small sets of data can be managed by DBMS.

- (i) data
- (ii) software
- (iii) time

(c) Its a CELL, intersection between row and a column having value

- (i) NULL
- (ii) NALL
- (iii) NELL

(d) Data is always some information.

- (i) useless
- (ii) useful

(iii) power full

Chapter-7 Network Security Tools

Q-1 Fill in the blanks

- (a) is a type of scam in which an email pretends to be from a bank or another trusted source in order to trick you into handing over your personal information.
- (b) The has made banking, shopping, and conducting other financial transactions online quite convenient.
- (c) Network management means things to different people.
- (d) The goal of accounting management is to measure utilization parameters so that individual or group uses on the network can be regulated appropriately.
